11 SUSTAINABLE CITIES
AND COMMUNITIES

B.SURE - EC2U SUMMER SCHOOL

The United Nations Sustainable Development Goal (UNSDG) 11 “**SUSTAINABLE CITIES AND COMMUNITIES**” is assumed here as one of the reference topics for the development of appropriate national and supranational policies. The European Campus of City-Universities (EC2U) is a multi-cultural and multi-lingual Alliance consisting of eight long-standing, education and research, locally and globally engaged universities from four diverse regions of the European Union

The school is strongly multidisciplinary and focuses on a strategic topic at international, national, and local level. The school intends to include in its activities a representative of students and teachers from each EC2U partner as opportunity for cooperation between the universities involved in the programme. It will also represent a community of teachers and students belonging to the different universities, who share common cultural, scientific and educational interests.

MAIN TOPICS OF B.SURE:

1. Innovative technologies for heritage representation and valorisation
2. Sustainable reuse of an historical architecture

The school is organised in different activities:

- Lectures with international lecturers on the topics of conservation, documentation, reuse and valorisation of Cultural Heritage
- Practical activities - workshops - for the design of the new functionalisation of a historical building vincolated for its cultural importance in the city of Pavia. This activity will be conducted by the school participants divided into groups.

CALL FOR STUDENTS

The school is for Msc students and PhD students interested in the topic of sustainable architecture, documentation of the historical built heritage and digitisation of architecture. Students currently pursuing master courses or master courses or PHD focused on the following subjects have a priority: Architecture, Building/Civil Engineering, Sustainability, Design.

The school will run from Monday, 23 September to Friday, 27 September 2024. On Friday the students will present the results of the three-day workshop during the closing event. The school is organised in presence at the **University of Pavia in the city of Pavia**. Further details on the agenda, how to reach the workshop venue and classrooms will be indicated later to the selected students.

For each partner university, selected students will receive an **EC2U grant** according to the EC2U project rates and local regulations of the University the student is enrolled. In the registration form, a **short CV** must be uploaded to ensure a fair distribution of the scholarships

Credits:

3 ECTS according to local university regulations
please contact your EC2U local coordinator
